Art Unit: 2183

Reasons for Allowance

None of the prior art of record teaches at least:

a) the combined features of the identifying the instruction loop, determination of whether execution of the loop was required, outputting the instructions when the execution was required, the execution of instruction stored in the first register, setting of the increment access signal to execute instruction stored in the second register immediately in sequence after the first register (claim 1);

b) the combined features of the fetch of the loop instructions, the storage of the loop instructions into the queue of plurality of registers, the tracking of desired instructions, the execution of instruction stored in the first register, setting increment access signal

to execute instruction stored in the second register immediately in sequence after the

first register for which instructions stored therein has just been executed (claim 12);

c) the combined features of the identifying the VLIW packet loop, determination of

whether execution of the loop was required, outputting the VLIW packets when the

execution was required, execution of instruction stored in the first register, setting

increment access signal to execute instruction stored in the second register

immediately in sequence after the first register (claim 23).
